Objective

Dedicated STEM student at Akaki Adventist Mission School with a growing interest in web development and embedded systems. I have foundational skills in HTML and basic Arduino projects, and I am eager to expand my knowledge in software and hardware technologies to solve real-world problems.

Education

Akaki Adventist Mission School

STEM Stream Student
Focused on science, technology, engineering, and mathematics.
Actively participating in practical and project-based learning.

Technical Skills

HTML5: Structure of web pages, headings, paragraphs, lists
CSS3 (Basic): Colors, fonts, simple layouts
Arduino (Beginner): Working with sensors and simple automation
Problem Solving: Applying logical thinking to projects

Projects

Smart Irrigation System

Developed a system using Arduino and sensors to monitor soil moisture
Automated water supply using a water pump
Aimed to improve efficient water usage in farming
Gained hands-on experience in electronics and programming

Completion

Artificial Intelligence Fundamentals

Awarded to

Strengths

-Fast learner and curious about technology
-Interested in building real-world solutions
-Able to work independently and in teams
-Strong interest in STEM innovation

Future Learning Goals

#Learn JavaScript for interactive websites
#Improve CSS (Flexbox and responsive design)
#Advance in Arduino and electronics projects
#Explore more real-life problem-solving projects
